GitHub Pages: How to Update Your Live Portfolio Website

1. Open Git Bash and navigate to your project folder:

   cd "C:/Users/14055/Desktop/Job Hunt/Portfolio/my portfolio"

2. Check which files have been modified:

   git status

3. Stage your changes (prepare them for commit):

   git add .

4. Commit your changes with a short message:

   git commit -m "Describe your update briefly"

5. Push your changes to GitHub:

   git push origin main

6. Wait ~30-60 seconds, then refresh your GitHub Pages link:

   https://yourusername.github.io/your-repository-name/

Tip: If your browser shows the old version, try Ctrl+Shift+R (force refresh) or open in Incognito mode.
